Review

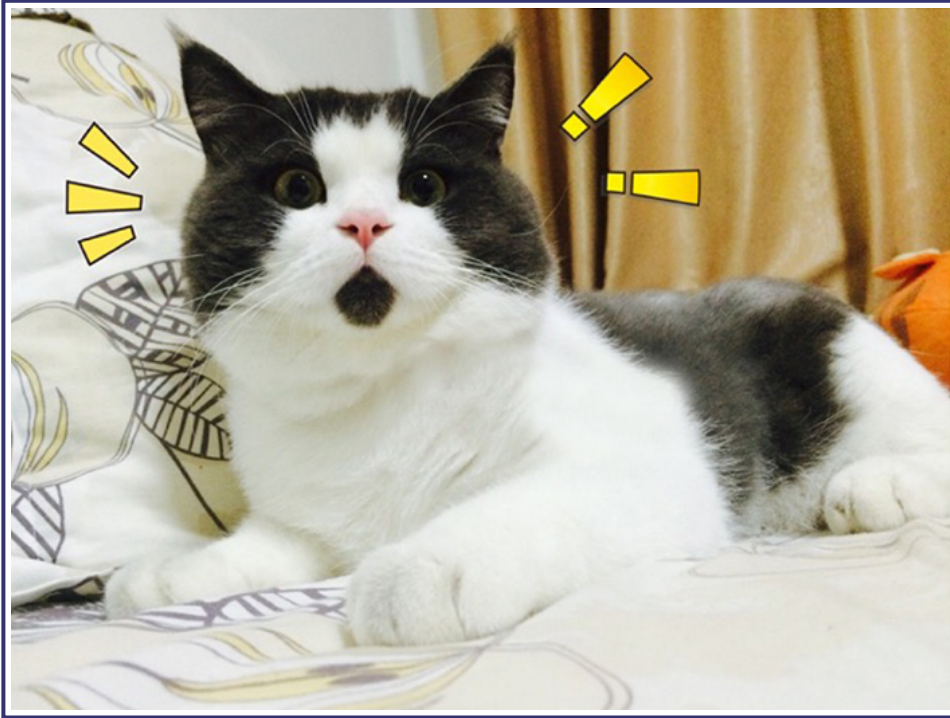

aka

looking again..

What will be in the exam?

WHAT?? TELL ME!! TELL MEEEEEE!!!!

OMG!!!!

What to study?

- * [only] things in slides
- * NO textbook content
- * NO linked content
- * no formulae, rote memorization, calculations, regurgitation of anything
- * KNOW what is what!

Topics

✧ Spatial DBs

✧ NoSQL

✧ Big Data 

✧ Data mining

✧ Machine learning 

✧ Data viz

General questions?

:)

Outro

It was GREAT fun, teaching you guys. I am going to miss you..

****But**** we can continue staying in touch: I'm on Facebook, on LinkedIn (as satychary), and on email.

And, do feel free to stop by my office any time!

Hope you continue maintaining an active interest in databases, Big Data, DM, ML, or even just plain old "data" (POD) :)

Remember: "facts are friendly!"

Good luck on the test!!
